

link' in the context of this figure? **Options:** A. A link that connects nodes with the highest values

B. The link under examination for feature construction

links D. The most frequently occurring link in the network

C. A predefined link that guides the construction of other

Question: Which of the following best describes the 'target

Label: B Rationale: The 'target link' is shown with a 'link-value' p, separated from the 'node-value' L, suggesting it is the specific link being analyzed for its features.
